Workplace Health Program Development Checklist

Assessment

A site visit or site review of the workplace has been conducted. o Interviews with key managers and employees conduced o Environmental assessment performed o Write site visit report
An inventory of current health-related activities has been completed. O Programs and services reviewed O Policies reviewed O Benefits reviewed O Environmental changes reviewed
 Data on employee health has been collected. Determine method(s) of data collection (e.g., paper, electronic, focus group) Determine topic areas of interest (health status, health behavior, use of preventive services, etc.) Administer the survey Analyze data
 Data on health care and pharmaceutical claims has been collected. Determine the period of review, unit of analysis, and diseases and conditions of interest Obtain data from health insurance provider(s) Analyze data
Review additional organizational data related to employee health. • Employee demographics • Organizational structure • Health benefits plans • Time and attendance • Vacation, overtime, sick leave policies • Injuries, disability, and worker's compensation • Employee engagement survey
Write an integrated workplace health assessment report

Planning/Workplace Governance

Support from leadership including senior executives has been received.
A workplace health committee or council has been formed. O Workplace Health Coordinator identified Committee has representatives from a broad range of organizational units Committee has diverse representation of managers, employees and their representatives (unions), and community organizations
The necessary resources to conduct the workplace health program have been secured. O Staffing O Space O Finances such as vendor contracts or incentives O Partnerships with community organizations O Equipment, materials and supplies
A workplace health improvement plan has been written including: Output A vision and mission statement Measurable goals and objectives aligned with overall business objectives Priority interventions with timelines and budget are selected Defined roles and responsibilities for key stakeholders including vendors or community partners An evaluation plan A communication plan
 Communications Program has branded the health strategy, including a logo Target audience(s) identified and background information such as demographics, interests, and information preferences obtained Materials and messages are culturally competent, relevant, and at a sufficient level of health literacy Messages use a variety of channels such as e-mail, newsletters, intranet, etc.
 Data Collection and Analysis Establish a routine data collection system of important health indicators Determine how data will be stored and who will have access to it Regularly report progress to key stakeholders

Implementation

Strategies and interventions are first pilot tested on a smaller scale.
Strategies and interventions are put in place according to the workplace health improvement plan timelines and budget.
Protocols from health-related programs are implemented as proposed (i.e., program fidelity).
Feedback on the process steps taken should be collected at regular intervals during the program's implementation.

Evaluation

- Use the CDC framework for program evaluation to develop an evaluation plan.
 - Engage stakeholders
 - Describe the program
 - o Focus the evaluation design
 - o Gather credible evidence
 - Determine baseline measures (from assessment findings)
 - Benchmark against national, state or industry specific data
 - Determine process measures
 - Determine outcome measures
 - Justify conclusions
 - o Ensure use and share lessons learned
